"A"	20"	16"	14"	11"	10"	9 1/2"	6 1/4"
"B"	14 1/2"	11 1/4"	9 1/2"	8"	7"	6 1/2"	4 1/4"

How to Measure

"A" Measurement: This measurement is the total length of the splint. Using a flexible tape measure, begin by placing it under the animals foot and measuring from the longest toe nail extending up the back of the limb, over the Hock to just below the dogs knee. (Place the limb as if the animal were in a standing position.)

Note: *The splint will not extend or support injuries to the animals Knee or Stifle.*

"B" Measurement: This measurement is taken from the Hock and extending down the back side of the limb, under the foot to the longest toe nail. (Place the limb as if the animal were in a standing position.)

*OrthoVet Splints are a "Generically Made Splint" and will not fit to every contour of the animals leg. Please call our toll free phone number if you have any questions on the sizing or the fit of these splints.
